Setting up a Zoho Creator account and exploring the platform architecture and interface.

Name : Abenanthan P

Roll No: 240701005

Aim:

To create a Zoho Creator account, develop a sample application using the built-in templates, and study the platform architecture and interface, including the **Develop, Deploy, and Manage** components.

Setting Up Zoho Creator:

Zoho Creator is a cloud-based low-code application development platform that enables users to create web and mobile applications using drag-and-drop tools with minimal coding. After creating an account, users can build applications, design forms, generate reports, create dashboards, and automate business workflows.

I) Create the Sample Application

Procedure

- Visit <https://creator.zoho.com>.
- Sign in using a Zoho account or create a new account.
- After successful login, select **Create New Application**.
- Choose **Start from Scratch** or select the **Demo Application** provided during sign-up.
- Enter the application name.
- Create the application.
- The application opens in the Zoho Creator workspace for further development.

II) Creating Forms, Reports, and Dashboard

A) Creating a Form

A **Form** is used to collect and store user information. It acts as the primary data entry interface of an application.

Procedure:

1. Click Create → Form.
2. Select Blank Form.
3. Drag and drop required fields such as:
 - Single Line
 - Number
 - Date

- Email
- Phone

4. Save the form.

The screenshot shows the 'Create from Scratch' interface for a 'Student List' form. At the top, there's a header with '< Back' and a close button 'X'. Below the title 'Create from Scratch', the 'Name form' is set to 'Student List'. A blue 'Create Form' button is visible. The main interface is divided into three sections: 'Basic Fields', 'Field Properties', and a bottom status bar.

Basic Fields: A grid of field types including Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date. The 'Address' field is currently selected.

Field Properties: A panel on the right showing configuration options for the selected 'Address' field. It includes:

- Field name:** Address
- Field link name:** Address
- Validation:** A checkbox for 'Mandatory' is currently unchecked.
- Address Options:** A checkbox for 'Capture geo coordinates' is checked, and 'Adjust location on map' is unchecked.
- Display Fields:** A list showing 'Address Line 1' is selected.

Status Bar: At the bottom, it shows 'Trial expires in 5 days', an 'Upgrade' button, and links for 'Get started faster!' and 'Help'.

Fig.2.1 Creating Form

B) Creating a Report

A Report displays the records stored in forms in different layouts such as list, table, calendar, spreadsheet, or Kanban view.

Procedure

1. Click Create → Report.
2. Select the desired form.
3. Choose the report layout.
4. Save the report.

The screenshot shows the 'Student Management Application' interface. On the left is a dark sidebar with a logo and navigation links: 'Student List' and 'Student Dashboard'. The main area contains a form with the following fields: 'Name' (split into 'First Name' and 'Last Name'), 'Number' (with a masked input '#####'), 'Email', 'Phone' (with a dropdown for country code '+91' and a masked input '81234 56789'), 'Address' (split into 'Address Line 1' and 'Address Line 2'), 'City / District' and 'State / Province' (both with dropdowns), 'Postal Code' and 'Country' (both with dropdowns), and 'Marks' (with a masked input '#####'). The top right of the interface shows 'Trial expires in 5 days', 'Upgrade', 'Edit this application', and 'Help'.

Fig.2.2 Application form

The screenshot shows the 'Student List Report' interface. The top bar includes the application name, navigation icons, and links for 'Trial expires in 5 days', 'Upgrade', 'Edit this application', and 'Help'. The main area displays a table with the following data:

	Name	Email	Phone	Number	Address
	Abenanthan P	abenanthan.p.2024.cse@rajalakshmi.edu.in	+919940867949	240701005	68 Krishna Road, Balaji Nagar, New Perungalathur, Chennai, India
	Tony S	tony@gmail.com	+911111122222	240701000	Gandhi Road, Netaji Nagar, Tambaram, Chennai , India

At the bottom, it says 'Showing 2 of 2'.

C) Creating a Dashboard

A **Dashboard** provides a visual representation of application data using reports, charts, KPIs, and widgets.

Procedure

1. Click **Create** → **Dashboard**.
2. Add reports and charts.
3. Arrange dashboard widgets.
4. Save the dashboard.

Exploring the Platform Architecture and Interface

Zoho Creator provides three major modules that simplify the application development lifecycle:

- Develop
- Deploy
- Manage

A) Develop

Definition:

The Develop module is used to design and build applications. It provides visual tools to create forms, reports, pages, workflows, schedules, and business logic with minimal coding.

Features

- Create Applications
- Design Forms
- Build Reports
- Create Pages
- Configure Workflows
- Deluge Scripting
- Dashboard Creation

B) Deploy

Definition:

The Deploy module is used to publish and share applications with users. It allows developers to deploy applications on the cloud, assign user permissions, and make applications accessible on web and mobile platforms.

Features

- Publish Applications
- User Access Control
- Share Applications
- Mobile Deployment
- Version Management

C) Manage

Definition:

The Manage module helps administrators monitor, maintain, and manage applications after deployment. It includes user management, security settings, backups, analytics, and application maintenance.

Features

- User Management
- Security Settings
- Backup & Restore
- Audit Logs
- Performance Monitoring
- Application Maintenance

Result

The experiment successfully demonstrated the process of creating a Zoho Creator account and developing a sample application. The **Develop, Deploy, and Manage** modules were explored, showing how Zoho Creator simplifies application development, deployment, and maintenance through its low-code platform.
